Mobile ECG Solution

PADECG A Mobile ECG Solution

PADECG consists of a professional ECG software and a wireless ECG acquisition module. It provides a mobile solution to meet the demands of caregivers in a mobile treatment environment. EDAN's reliable SEMIP algorithm is also provided in it, which allows you to have a fast and confident ECG assessment before sending the ECG report to Smart ECG Viewer for further analysis.

Patients Registration

- User-friendly Interfaces
- Reliable Interpretation
- Extensive Communication

Touch Screen

- Operating PADECG is just as simple as using your smart phone. Convenient gestures such as long pressing, un-pinching, and dragging are all supported to enable users a better experience.

ECG Sampling

- Both pre-sampling and real-time sampling modes are offered to cater to different situation, no matter it is an emergent case, general ward rounds, or home visiting.

Filter

- Armed with the comprehensive filters, you can acquire superb ECG traces with full confidence just within several touches.

Algorithm

- With EDAN's professional ECG algorithm SEMIP, PADECG gives accurate diagnosis results and offers doctors a reliable reference.

★ *Tablet is not included in PADECG. Customers need to purchase tablet by themselves.*
